The new FAQs are included below. To view all the FAQs, as well as the Sanctioned Interpretations, go to the IATF Global Oversight website: . FAQ 23 – clause 8.5.1.3, Verification of employment settings QUESTION: If the validation of a first or last part is not performed or appropriate for a specific type of manufacturing process, are such records that will be maintained by 8.5.1.3 ANSWER: As indicated in 8.5.1.3 d), validation of the first or last part is performed only when applicable and appropriate. When validation is not done because it is not applicable or appropriate, there is no need to keep records. The periodic revision is already defined in section 3 of the standard: "Maintenance methodology to avoid an important unplanned breakdown where, according to the history of failures or interruptions, a equipment or a subsystem of the equipment, it is proactively eliminated and is eliminated from service and is eliminated proactively and is proactively eliminated. disassembled, replaced, replaced, reensamblated and then returned to the service. Perhaps the periodic review is not applicable to some types of tools and equipment. Perhaps S Some tools are simply replaced with a new tool at the end of their ã Étil. However, all tools and equipment have a limited life based on the use, time or other known factors. The manufacturer of tools and equipment would be a good source to determine what factors and estimate how much important work should be completed. Periodic review or its appropriate equivalent (for example, re place) should be counted in the steps of the maintenance plan of the organization. 1.
